**Welcome to
KUDA PHONEBASE**

Established in 1993, KUDA Phonebase has become a leading specialist for high-quality car model-specific mounting systems. As a manufacturer, we have the know-how, flexibility and pioneering spirit to respond quickly to the changing demands of the market. Our success speaks for itself: the innovative solutions for hands-free kits, navigation systems, iPods, MP3 players, laptops and PDAs from KUDA Phonebase are today among the bestsellers in the market.

We supply retailers in Europe and the US with mounting and holder systems. We offer solutions for both left-hand and right-hand steered vehicles. We not only supply the mounting systems and holders but also the communication equipment. Our comprehensive range of top-quality brand products includes hands-free kits, sat nav devices, mobile phone accessories and cables. KUDA Phonebase also supplies complete packs of phone consoles, hands-free kits and antennas that are specially devised to suit the various car models.

As the laws regarding the use of windscreen-mounted sat nav units are changing in many countries, we are currently focusing on navigation consoles that meet the latest statutory requirements. As a rule, sat nav devices must now be placed outside the field of vision of the driver. We offer highly competitive complete

packs that include a charging and device cradle and a navigation console with or without sat nav device.

Take advantage of a complete solution from a single supplier.

As a global leader in the market, we are dedicated to innovation, offering our customers future-proof solutions. Our development and production departments cooperate closely with car manufacturers to implement new solutions that offer users new advantages.

Our experience as a manufacturer of GFR products and advanced technology enable us to produce customised special solutions. We not only manufacture special products and small series but use our know-how and expertise to develop new products.

We wish to take this opportunity to also thank you, our customer. Your ideas and suggestions have time and time again inspired us to find new solutions and to improve our services. Without your input, we would not have been able to be as successful as we are today.

Yours sincerely,

**Opt for safety –
change your car interior!**

The laws are becoming more stringent!
We put an end to obstructed vision through
the windscreen. Opt for safety.
Sat nav devices in cars should be installed
so that they do not obstruct the view of the
driver.

**All information at your fingertips –
without obstructing your view**

Sat nav devices that are attached to the
windscreen with suction cups obstruct the
field of vision of the driver, which can be
extremely dangerous.

With a clear view of everything

*We put an end to
obstructed vision.*

**All information at your fingertips –
without obstructing your view**

Sat nav devices that are attached to the windscreen with suction cups obstruct the field of vision of the driver, which can be extremely dangerous.

- Such installations are not permitted in commercial vehicles or company cars as they might reduce the commercial insurance cover.
- In certain cases, users might be liable to a fine.
- The discussion on the dangers of wind-screen-mounted sat navs is bound to continue. Legislators are working on new regulations.

KUDA mobile phone and navigation consoles for HGVs and vans are different and provide optimum safety.

Be careful with mobile sat nav devices

**KUDA mobile phone consoles
– boosting your sales**

Whether for sports cars, top class limousines, family cars, small cars, vans or HGVs - find the perfect solution among the 3500 models of KUDA mobile phone consoles.

Save money: Compared with other products, the installation of the kit is extremely easy and fast, doing away with long fitting times and high installation costs. There is no need to drill holes through the dashboard.

The result: a TÜV-approved KUDA mobile phone console that perfectly fits your car model. No sharp edges. All parts made of shatter-proof material. Cables are concealed inside the KUDA console and therefore do not clutter up the car interior.

We also provide tailor-made solutions that meet your specifications. Simply let us know what you need.

Everything from a single provider! Save shipping and logistics costs with every order.

Consistent design

Act now: opt for a future-proof solution from KUDA Phonebase

All KUDA navigation and multimedia consoles are installed in such way that the driver's view through the windscreen is not obstructed.

Unobstructed view

Manufactured by KUDA Phonebase
Quality knows no compromise

In our daily work, we always strive to achieve the best possible solution for any problem, and this challenging task is our key motivation. When it comes to quality car leathers, precision finish or easy and perfect installation of our mobile phone and navigation consoles – we make no compromises.

You can choose between original car leather and strong Mobilia imitation leather and colour leather products to match the car interior. Our leather supplier Wollsdorf is the only leather manufacturer worldwide to be certified according to ISO/TS 16949.

Continuous quality inspections are part of our daily routine, and the TÜV mark certifies the quality of our products and processes. You can thus rest assured that we will continue to be at the forefront when it comes to future-proof products and solutions.

We are certified according to ISO 9001.

Hand-made

**Your special wishes
– we can fulfil them**

As a manufacturer of equipment, we can offer you perfect solutions for your individual requirements.

We have many years of experience in the automotive sector. Our production workshops are equipped with the right equipment for customised production. We can thus develop and produce GFR formed parts in any size and shape. In addition, we offer a wide range of sewing services. In all cases, we work exactly to your specifications.

Contact us to discuss your ideas and wishes with our specialists. We would be delighted to provide you with an offer for your special requirements.
